DETAILED ACTION

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claim 4 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 4 recites the limitation "the telescopic element" in line 1. There is insufficient antecedent basis for this limitation in the claim.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1-17 are rejected under 35 U.S.C. 102(e) as being anticipated by Guillot et al (#6,733,071).

Application/Control Number: 10/751,287

Art Unit: 3636

Guillot et al show a recliner comprising a seat (6), backrest (7) pivotally installed on the seat, a stool (9) movably on the seat, a first mechanism (30), and a second mechanism (40).

With claim 2, the seat has a frame.

With claim 3, the backrest has two levers.

With claim 4, a telescopic element is a hydraulic cylinder.

With claim 5, the first mechanism has a handle pivotally installed on the frame, a linkage connected the handle and one of the levers and a telescopic element connected between the linkages.

With claim 6, the linkage of the first mechanism includes a first link non-rotationally connected with the handle.

With claim 7, the first mechanism has a crossbar.

With claim 8, each of the linkages of the first mechanism has a first link secured to the crossbar.

With claim 9, the second mechanism includes a handle pivotally installed on the frame.

With claim 10, the linkage of the second mechanism includes a first link non-rotationally connected with the handle.

With claim 11, the second mechanism has a crossbar.

With claim 12, each of the linkages of the second mechanism has a first link.

With claim 13, the backrest has a crossbar rotationally installed on the frame.

With claim 14, the stool has a crossbar.

With claim 15, each of the linkages of the stool has a second link pivotally connected with the first link.

With claim 16, each of the linkages of the stool has a bracket.

With claim 17, the stool has a spring.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Rogers et al, Pacitti et al, Tseng, Lapointe'108, and Mizelle are cited as showing similar types of recliner.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Stephen A Vu whose telephone number is 571-272-6862. The examiner can normally be reached on M-Th from 8:30 am to 7:00 pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Peter M Cuomo can be reached on 571-272-6856. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
